**NOTES:**

Miscellaneous items, directed work, connections, etc., not specifically listed but required to complete the proposed sewer main line work, and lift station to a complete and operational system shall be included in the Bid under the most appropriate Bid Item. \*\*\*Contractor is to verify all pipe size and flow line elevations prior to ordering manholes.

Contractor shall submit bids and hold price for a period of no more than 60 days from the bid opening. All work shall be done in accordance with ADEQ, ADH & Union Pacific Railroad requirements.

Items that are subsidiary to performing the work shall include all labor, equipment, and materials shall be supplied by the contractor. Existing utilities and improvements shall be protected during construction and contractor shall coordinate with City of Stephens Utility Department for connections to existing sewer main. Protection measures shall be approved by the engineer prior to construction.

Haul routes approved designated by the city shall be restored to original conditions upon completion of the work. This area is not included in seeding / revegetation and shall be considered subsidiary to the work.

## **METHOD TO DETERMINE**

The lowest bid shall be the lowest bid price on the base contract, depending upon available funds, without consideration of the prices on the additive or deductive items. If all base bids submitted exceed the amount appropriated for the award of the contract, then the owner will determine the apparent responsible low bidder by deducting each alternate, in numerical order, from the total base bid.
